

Freeze-Dried

# Beauty Smoothie Melt

Containing Biomimetic Vegan Collagen Peptides

Say goodbye to gummies and enjoy your daily glow – now in a tasty, snackable form!

## SHAPES AVAILABLE

- Powder for instant beverage applications
- Square melts for snacking and other applications

## INGREDIENTS

Banana Puree, Carrot Puree, Apricot Puree, Hydrolyzed Vegan Peptides, Lemon Concentrate

## BENEFITS

- Vegan product - composed of plant-based peptides
- Allergen-free
- Sweet and tasty for those healthy foodies
- 100% natural
- No artificial ingredients
- No artificial ingredients
- No added sugar
- No off-taste
- No additives or preservatives
- Melt-in-your-mouth texture
- Multiple packaging options

## PRODUCT SAMPLES

**Snack:** Beauty Smoothie Melt

- Application: 12g sachet to get 1.5g/day of collagen peptides \*

The plant-based collagen peptides used into this recipe present the characteristics below:

- Contains 9 essentials amino acids
- Rich in key amino acids directly related to collagen synthesis: proline & glycine – higher levels than animal collagen
- Higher bioavailability: bioactive peptide forms (peptides containing less than 4 amino acids)
- Faster absorption: Smaller average molecular weight (1000 Dalton in average, less than 1000 Dalton accounts for 40%)

\*A Clinical study has been done on these vegan collagen peptides. The results highlight that for 1.5g of consumption per day, the participants had positive effects on th their skin with an improvement of the moisture, reduction of the skin fine lines & pores depth and improvement of the pigmentation and reduction of the roughness of the skin.
